Ben was wonderful to deal with. He has great knowledge of the products he sells and gave me a very fair price. The installer technicians were just as efficient and the entire process went very well. I would definitely recommend Lincoln Way to anyone.

Wow! Ben was great. He came late at night and repaired our A/C unit. He was very informative on what options we had, and fixed everything right away. We are beyond thankful for his service, and we are now resting comfortably in cool temped house.

Ben was great to work with - He was able to get out to our house within 2 hours of calling to fix our AC. He explained everything as he was doing it and gave many options for how we could fix our unit which I greatly appreciated. He was able to get everything up and running in less than two hours! Would definitely recommend and use again if an issue came up.

Had a ineffective condenser unit that Ben immediately diagnosed. He gave me options to consider. He fixed the problem so quickly on a 100 degree day. I was very impressed. I Highly recommend his services. Then we decided to get a new furnace and AC unit installed. It took a few hours then it was complete. Very Professional work. Absolutely I recommend services Highly.

Lincoln Way Heating and Cooling, Thank you for installing our new air conditioning system, we love it! We had planned to replace our aging system this year, it just so happened you showed up on my fb news feed and I decided to check you out. I love your completely transparent cost estimator tool, fantastic. I immediately set up an appointment and met Ben. He's great and took excellent care, he's truly gifted at helping folks like us and when Ben left our house we were all set. On the day of our installation the service we received was excellent. The installers were professional, efficient, and very skilled. They left our home just the way they found it, no problems. Thank you for helping us with our new air conditioning system, Lincoln Way.

Best Regards,

Kevin Crosson

I, without a doubt, highly recommend Lincoln Way Heating and Air to anyone who is needing a service. Ben was professional and incredibly kind and honest. He went above and beyond to fix my air, and did so without charging me extra. When it went out again, he came back that same night and worked on it until it was fixed. Ben is a pleasure to work with, and he is dog friendly!!! I can't say enough wonderful things about his business and kindness!!

Super appreciate Ben for his swift response, expertise, and wonderful professionalism in responding to a last-minute A/C service request on a brutally hot day. I'm sure his business was already receiving many other similar requests yet his focused attention made us feel like we were his top priority. Would absolutely recommend. Thanks, Ben!

Ben was very helpful and professional when he came to access our HVAC! This company is all around wonderful and just awesome! The installers were Soo nice and professional, I am just sorry I didn't learn their names so I can give the credit to where it's due! It was also really nice how Ben checked in a little bit after the installers left just to check in on how everything went! This is the nicest company I have ever dealt with!

Ben, saved the day, night and my entire year. He literally rescued us with his quick response time. I was awaiting a call from the absolutely worst home warranty company AHS who wasn't able to find us a contractor to come out after 9pm. Ben actually called me back to see if I still needed his assistance

Lincoln Way Heating and Cooling came recommended to me and the service was excellent! Ben answered all questions quickly and honestly. I was able to communicate with Ben via the phone, email, and text. We needed a new hot water tank and Ben made sure to come out the next day. Also, installed a whole house humidifier, which was much needed! Prices were very fair and service was above average. Would highly recommend.

We had a last minute emergency as our furnace went out at the worst time ever. He was responsive and arrived within 30 minutes. He did an outstanding job, he was very professional, knowledgeable and friendly. I highly recommend him and the company..
